django-taggit

"A simpler approach to tagging with Django"

```python
from django.db import models

from taggit.managers import TaggableManager

class Food(models.Model):
    # ... fields here

    tags = TaggableManager()
```

django-taggit-helpers

Provides four helper classes that make it easier to work with django-taggit tags

- TaggitCounter

- TaggitListFilter

- TaggitStackedInline

- TaggitTabularInline

TaggitCounter

Display (and sort by) number of Taggit tags

# of Tags
3
0
2
1
0

# of Tags	1 ▽
3	
3	
2	
1	
0	

# of Tags	1 △
0	
0	
0	
1	
2	

TaggitCounter
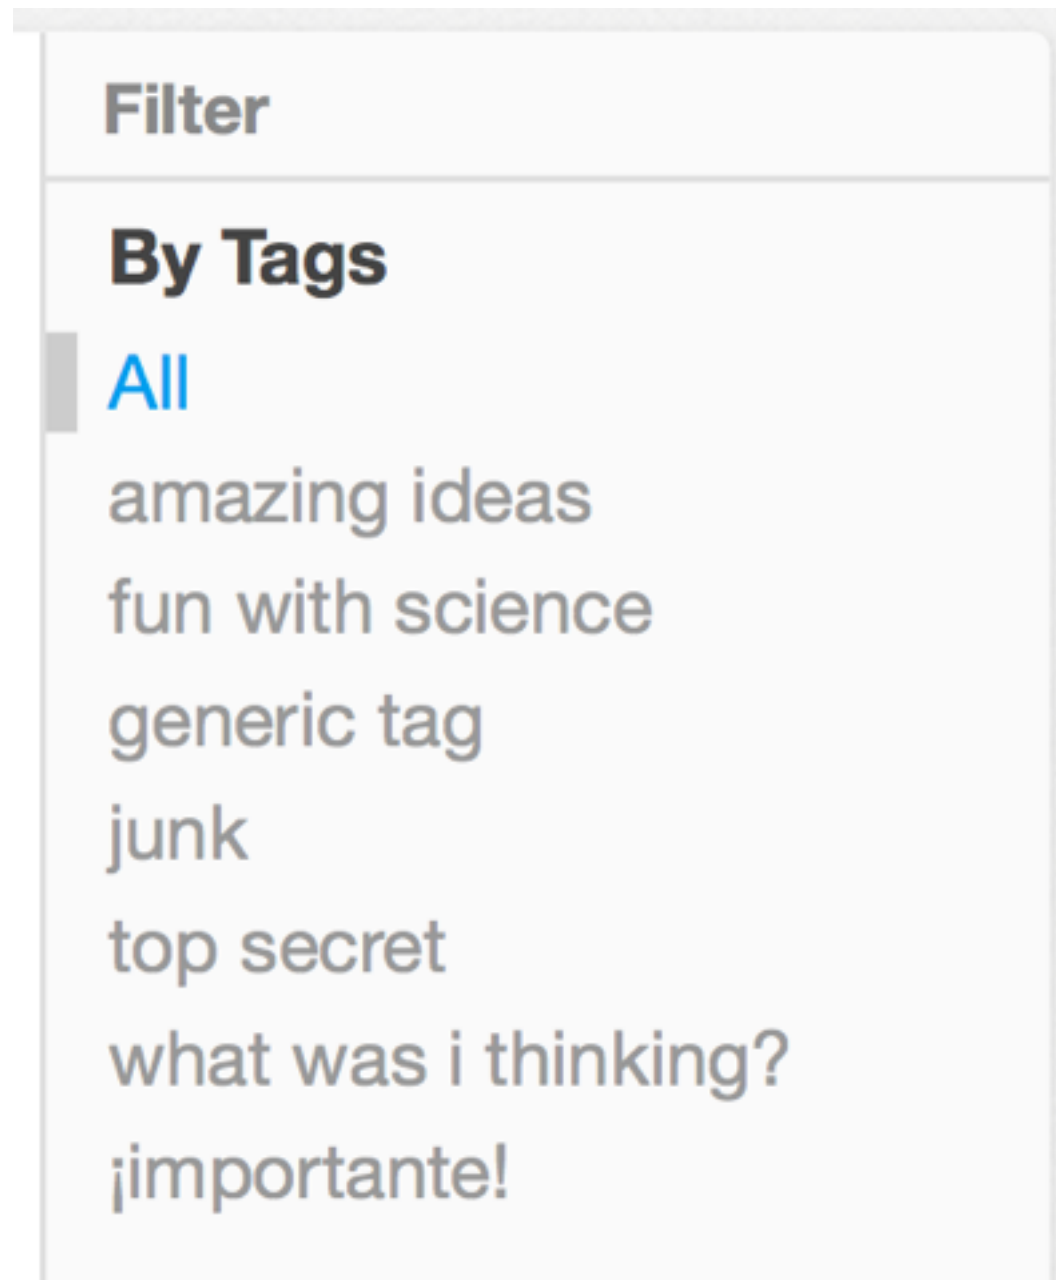

Display (and sort by) number of Taggit tags

```python
from taggit_helpers import TaggitCounter

class MyModelAdmin(TaggitCounter, admin.ModelAdmin):
    list_display = (
        ...
        'taggit_counter',
    )
```

TaggitListFilter

Filter records by Taggit tags (for current model only)

TaggitListFilter

Filter records by Taggit tags (for current model only)

```python
from taggit_helpers import TaggitListFilter

class MyModelAdmin(admin.ModelAdmin):
    list_filter = [TaggitListFilter]
```

TaggitStackedInline/TaggitTabularInline

Add stacked/tabular inline for Taggit tags

Without django-taggit-helpers:

Tags: "top secret", "what was i thinking?", ¡importa

Add keyword tags that represent this data file.

TaggitStackedInline/TaggitTabularInline

Add stacked/tabular inline for Taggit tags

With django-taggit-helpers:

Tags

Tag	Delete?
My Very Favorite Record tagged with top secret	
top secret ⬍ ✚	☐
My Very Favorite Record tagged with what was i thinking?	
what was i thinking? ⬍ ✚	☐
My Very Favorite Record tagged with ¡importante!	
¡importante! ⬍ ✚	☐
--------- ⬍ ✚	
--------- ⬍ ✚	
--------- ⬍ ✚	

TaggitStackedInline/TaggitTabularInline

Add stacked/tabular inline for Taggit tags

```python
from taggit_helpers import TaggitStackedInline

class MyModelAdmin(admin.ModelAdmin):
    inlines = [TaggitStackedInline]
```

```python
from taggit_helpers import TaggitTabularInline

class MyModelAdmin(admin.ModelAdmin):
    inlines = [TaggitTabularInline]
```
